DRAFT Collaborator Selection Criteria

The PLSR needs to develop selection criteria for two groups of collaborators: (1) 10 Core Recommendation Collaborators and (2) 45 Model Development Conference participants.

Core Recommendation Collaborators

Possible selection criteria for choosing the ten individuals to work alongside the Steering Committee to guide the preliminary decisions on a new model for supporting public libraries in April, May, and June include:

- Represents a perspective (member?) of at least one key stakeholder group
- Past leadership role of a regional or statewide library group or association
- Demonstrated deep experience with or knowledge of the operations of library systems
- Experience working for a library or a library system
- Experience working with multiple library systems in Wisconsin
- Experience with library support structures outside of Wisconsin
- Able to articulate the interests of large or small, urban or rural libraries or library systems

Additional factors that the Steering Committee would then use to select the final set of 10 CRC members might include:

- Representativeness of library size
- Representativeness of urban and rural
- Representativeness of north, south, east, and west
- Representativeness by years working with libraries or library systems

Model Development Conference Collaborators

Possible selection criteria for choosing the forty-five individuals to work with the Steering Committee and CRC members at the Model Development Conference in July include:

- History of active participation in state/regional library or library system conferences
- Past leadership role of a regional or statewide library group or association
- Experience working for a library or a library system
- Experience working with multiple library systems in Wisconsin
• Able to articulate the interests of large or small, urban or rural libraries or library systems

•

•

Additional factors that the Steering Committee would then use to select the final set of 45 participants in the Model Development Conference might include:

• Representativeness of library size
• Representativeness of urban and rural
• Representativeness of north, south, east, and west
• Representativeness by years working with libraries or library systems
